

5TH ANNUAL
HOT TOPICS *in the* **SCIENCE OF SECURITY**

APRIL 10-11, 2018 | NORTH CAROLINA STATE UNIVERSITY | RALEIGH, NC

"Go SoS"

HoTSoS is a research event centered on the Science of Security, which aims to address the fundamental problems of security in a principled manner.

The 2018 HoTSoS event, scheduled for April 10-11, 2018 in Raleigh, North Carolina, will bring together researchers from diverse disciplines to promote advancement of work related to the science of security. The conference will feature a mix of invited talks, panels, tutorials, and refereed papers to be published by ACM.

The Science of Security (SoS) emphasizes the advancement of research methods as well as the development of new research results. This dual focus is intended to improve both the confidence we gain from scientific results and also the capacity and efficiency through which we address increasingly technical problems.
